

Tailored security solution to protect logistics real estate

Background

Prologis is a leader in logistics real estate, they acquire, develop and maintain the largest collection of high-quality logistics facilities in the world. Clearway is a pan European, approved security and safety solutions provider, collaborating with Prologis across the UK.

Our client acquired a new site in Luton in January 2021 and reached out to Clearway for expert security advice to secure, monitor and protect their latest acquisition.

Solution

Based on our recommendations, a bespoke security package was created which included concrete barriers, Heras fencing, mobile solar-powered CCTV towers, manned guarding and K9 security dog units. This was further supported with the installation of clearly visible security warning boards, a temporary vehicle access gate and a welfare cabin.

Key Services

-  Manned guarding
-  CCTV towers
-  Concrete barriers
-  Fencing

Outcome

Due to our security expertise, the site has remained continuously secure since our solutions were installed, successfully protecting the site against theft, vandalism and illegal trespass. Our team regularly meets with Prologis to ensure their requirements are continually being fulfilled and to evaluate the continued technological solutions Clearway can provide.

This successful collaboration has since expanded, with Clearway being appointed across a number of UK Prologis site locations providing tailored security solutions.
